

## REMS (RADIATION ENERGY MAPPING SYSTEMS)

### Free Product Trial

With the success of the original product launch i2s Technologies will be offering an extended trial program that provides a full working version of REMS Enterprise Suite (REMS ES) software to all qualified customers.

The program is open for customers in Canada, USA, South America, Europe and parts of Asia. For specific country not listed, please contact i2s Technologies ([info@i2stech.com](mailto:info@i2stech.com)) for further information on availability.

The program from i2s Technologies is intended to assist you in comparing the old methods of RF Radiation Prediction to the sophisticated yet easy to use 3D visual RF Radiation Prediction/Simulation in REMS software.

Qualified customers will receive a full working version of the REMS Enterprise Suite software at no cost for the trial duration.

The package includes the following:

1. REMS Enterprise Suite in English and Multiple Radiation Safety Standards (Valued at \$60,000.00 per package).
2. High Encryption USB Security Key to Protect REMS ES and Designs.
3. REMS ES Electronic Manual.
4. REMS SQL Loader Software to Build/Convert Antenna Patterns.
5. REMS Basic Antenna Database.
6. Free Email Technical Support.
7. Microsoft SQL 2005 Express Edition.

To enroll in this program, simply email i2s Technologies at [info@i2stech.com](mailto:info@i2stech.com) with your contact information, and we will arrange for your program enrollment.
